EXPERIENCE

Associate Technical Consultant *ACI Worldwide, Mumbai* Jul 2026 – Present

- Developed Card Inquiry Card Update APIs in UPF for Indian Bank's IVRS channel, integrating Middleware–UPF–BASE24 using JSON and ISO 0300/0310 transactions; implemented card block/unblock, limit updates, CAF processing, authentication, and SMS notification workflows.
- Engineered UPF–EIS–Visa VMORC API integration for SBI, implementing scheduled/paginated offer retrieval, payload validation and transformation, offer lifecycle management, repository persistence, and AES/RSA-based encryption and digital-signature security for enterprise API communication.

Technical Consultant Intern *ACI Worldwide, Mumbai* Jan 2026 – Jun 2026

- Engineered PAN validation integration in UPF for BASE24 ATM Re-KYC workflows, implementing ISO 8583 0200/0210 message processing, DE-125 data extraction, API integration with PAN validation services, customer-data validation, and response-code mapping.
- Developed end-to-end payment transaction flows in UPF, integrating BASE24 with external banking services through HISO interfaces and implementing request/response processing, data transformation, validation, and error handling for customer-specific payment workflows.

Software Engineer Intern *Home First Finance Company, Mumbai* Jun 2025 – Aug 2025

- Engineered an end-to-end loan origination workflow, covering lead capture, application processing, document verification, underwriting, disbursement, and closure for scalable financial operations.
- Developed Salesforce-native dashboards and modular components, providing real-time visibility into loan lifecycle status and operational metrics while improving system maintainability and reliability.

PROJECTS

Sentinel AI *Python, Flask, Node, React, TensorFlow, SDN, Ryu, Linux* Link

- Designed and built an AI-driven real-time DDoS detection system for 5G networks, leveraging ensemble ML models, achieving sub-50ms inference latency and automated threat classification.
- Implemented SDN-based autonomous mitigation pipeline to dynamically insert flow rules for IP quarantine, enabling real-time attack containment under simulated multi-vector load conditions.

Knowledge Hubs *Angular, FastAPI, Neo4j, GraphRAG, Vector Embeddings* Link

- Built a full-stack GraphRAG platform that transforms unstructured documents into searchable knowledge graphs using LLMs, vector embeddings, and semantic retrieval.
- Engineered a scalable AI pipeline with FastAPI and Neo4j for knowledge extraction, graph-based retrieval, cross-document linking, and citation-grounded question answering.

Peachy Shop *Java, Spring Boot, Maven, React, SQL, Docker, Redis* Link

- Architected and built a scalable full-stack e-commerce system with stateless dual-token authentication, role-based access control, 20+ APIs, pagination, optimistic locking, and secure credential handling.
- Designed a high-performance, concurrency-safe data layer, achieving sub-100ms cached responses, reducing database load, and supporting 100+ concurrent users with resilient fallback mechanisms.

SKILLS

Languages: Java, Python, JavaScript, Typescript, HTML/CSS, SQL
Frameworks/Libraries: React, Next.js, Node.js, Flask, FastAPI, Spring Boot, TensorFlow, JUnit, UPF
Tools & Platforms: Git, Docker, Kubernetes, Jenkins, Maven, Linux, Redis, GCP, Salesforce
Databases: MySQL, PostgreSQL, OracleDB, MongoDB, Neo4j

EDUCATION

K.J. Somaiya College of Engineering, Mumbai May 2026
B.Tech in Information Technology *CGPA: 9.2/10*
